

## Current Situation

The people of the Vietnam Mekong Delta struggle with the availability of fresh water every year. Surface water and ground water are prone to contamination. Rainwater is trusted, but harvesting methods are limited. Drinking water depends on donations. We provide a solution for the short-term domestic water demand.

## Paracatch Concept

Paracatch is a portable rainwater catchment, which can be set-up anywhere. It can be connected to any water storage. It is easy to clean and can be shared in a community.

## Applications

- Elevated storage
- Underground storage
- Hand pump connection

- Wall bracket
- Flexible storage
- Direct hose connection

- Easy to install
- Water tower
- Community based

## Benefits

- Versatile product
- Builds on existing installations
- Made from readily available materials
- Adaptable for future development
- Made from only 5 key components
- Easy, low-cost maintenance
